

Approved For Release 2005/04/22 : CIA-RDP85B00803R000100040075-8

OPERATIONS SEQUENCE:

Handling of recovered pod: LMSD designed a hermetically-sealable container to go aboard each recover aircraft since the film pod must remain unsealed until it is delivered to EKC for processing. The recovery crew was therefore instructed to seal the capsule inside the container as soon as picked up. The container was to be escorted by ~~USAFxxxxxx~~ Project Security Courier to Eastman, Rochester, and the USAF was to provide fastest available transport for most expeditious delivery.
